DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of invention I in the reply filed on 7/5/05 is acknowledged. Claims 1-6,13,25-30 and 37 read on the elected invention and will be examined as follows. The remaining claims are withdrawn from consideration as being drawn to non-elected subject matter.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1,2,13,25,26 and 37 are rejected under 35 U.S.C. 102(b) as being anticipated by Treace (US 3528720).

Treace shows a drape system for a surgical microscope including a drape(35) and a holding device including a plastic (col. 4 line 50) holding unit(53) with a recess(63) for the main objective, the holding unit have a plurality of tongue-shape

sections(55a) for applying a spring force onto the outer peripheral surface of the objective (col. 5 lines 13-17).

Allowable Subject Matter

4. Claims 3-6 and 27-30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach or suggest the plurality of tongue sections to have different lengths as set forth in the combination of claim 3 or 27.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Walchle shows a drape system including a plurality of tongue sections(263).
